READY-TO-LAY PULLETS (18 to 20 week old)

“READY-TO-LAY” refers to pullets that are at the maturing stage (age and weight), and will usually start laying within 2 to 4 weeks if proper management and environmental conditions are adhered to.

Please note that other breeds mature several weeks slower than the Red Sex-Link.

All RTL are beak treated at day old to help prevent picking and egg breakage. Beak treatment still allows the hens to “scratch” feed or range. Pullets will have been on 12 hours of light per day when you receive them. Increase ½ to 1 hour per week (in the morning) until you reach 16 hours of light per day. Total hours of light per day and proper nutrition (no scratch or “green scraps”) will bring the pullets into lay. Greens and scratch may be given at a later age, however, if birds have access to these feed sources we recommend a vitamin supplement in the water to prevent a nutritional deficiency. As well, if you plan to allow your pullets access to the outdoors, consider putting a “wormer” medication in the water (1 or 2 application days – available from your feed supplier).

New and used crates are available for purchase. **WE DO NOT RENT OR LEND CRATES.** Green crates are an exclusive colour to Frey’s Hatchery and are NOT SOLD under any circumstances. Frey’s Hatchery cannot allow any of our crates to be used for any other purpose than our Ready-to-Lay deliveries.

Proper Handling Procedures to Prevent Contamination: Please be aware that all poultry, even chicks, are livestock and should be treated as such. Proper handling procedures will reduce or eliminate the chance of bacterial contamination. A human hand can have hundreds of species and millions of individual bacteria on it, as can poultry. **Wash your hands with soap and water after handling poultry or any equipment that comes in contact with poultry.**

Frey’s Guarantee: We guarantee 100% live arrival of the quantity ordered. Extras may be included in your order. Orders are accepted subject to conditions incidental to the hatchery business. Our responsibility for loss or damage arising out of incorrect shipment of breeds, sex or numbers, delay or failure of shipment or any other cause is limited to the original price paid. Frey’s Hatchery Ltd. operates under Federal and Provincial government regulations in regards to the operation of a licensed hatchery, animal husbandry practices, and disease control standards. It is understood and agreed that no representation or warranty as to livability, production, freedom from disease, fitness for use, or otherwise, is made by Frey’s Hatchery Ltd.

D-2 & D2R (24)

Place order 4 weeks in advance for day olds.

Ready-to-lays are available on a first-come first-serve basis.

Please note that ready-to-lay delivery days of the week are subject to change dependent on outside air temperatures and the logistics of arranging deliveries.

Day-old Chicks: Transport in the boxes at 75°F/24°C and DO NOT put them in direct sunlight or cool drafts.

- Temperature 92°F/33°C at level of chicks (2 in/5 cm) from the top of the bedding.
- A thermometer is a MUST! A hi/lo thermometer is best.
- 3 to 4 in/8 to 10 cm of bedding (preferably shavings).
- You can put a sheet of styrofoam under the shavings.
- No drafts in the brooding area (18 in/46 cm high guard should be used to stop drafts). Keep brooding area “rounded” so chicks don’t crowd into a corner and smother. Enlarge brooding area as they grow and temperatures are lowered.
- Lower temperature 4°F/2°C per week until six weeks old.
- Keep shavings dry (clean up water spills or leaks and replace with dry shavings).
- Keep water and feed very close to chicks.
- Use lukewarm water in drinkers at first and dip the chick’s beak in the water when you take them out of the box.

White Rocks:

Same as above along with these extra tips

- White Rocks are a **VERY** picky breed and need their conditions to be perfect.
- They require a consistent temperature of 92F/33C degrees for their first week and then following the guidelines above for decreasing heat. We recommend raising your chicks in an inside environment where you have better control of regulating heat. A thermometer is a must to monitor this.
- Please note that our chicks go home to various environments so we cannot control your success once they leave our facility.
- More information can be found at www.freyshatchery.com under *CHICKENS, White Rock Care*.

Turkeys and Pheasants:

Same as above EXCEPT

- Temperature at their level 95-99°F/35-37°C.
- Put a cloth, towel or coarse permeable covering on top of the shavings in the brooding area and scatter feed all over it. (This will allow them to learn what feed is more easily and prevent them from slipping and causing irreversible leg damage.)
- Remove the cloth after a day or two or if it gets too damp or wet.
- Always have lots of feed trays and drinkers very close to the turkeys.

Ready-to-lays:

- Ready-to-lays can handle lower temperatures during transit but do not let them get overheated...keep air moving around them if it is a warm day.
- Pullets have been on 12 hours of light per day when you receive them. Increase ½ to 1 hour per week in the morning until you reach 16 hours of light per day. Total hours of light per day and proper nutrition (no scratch or “green scraps”) will bring the pullets into lay. Greens and scratch may be given at a later age, however, if birds have access to these feed sources we recommend a vitamin supplement in the water to prevent a nutritional deficiency.
- If you plan to allow your pullets access to the outdoors, consider putting a “wormer” medication in the water (1 or 2 application days – available from your feed supplier).

White Rock Weights

Approximate White Rock Live Weights						
Age in weeks	Females			Males		
	kgs	lbs	Approx feed kgs	kgs	lbs	Approx feed kgs
3	.7	1.5	1.1	.8	1.75	1.3
4	1.2	2.6	2	1.4	3	2.3
5	1.7	3.7	3	2.0	4.4	3.6
6	2.2	4.8	4.5	2.7	6	5
7	2.7	5.9	6	3.4	7.4	6.6
8	3.2	7	7.5	3.9	8.5	8.2
9				4.3	9.4	9.5

Note: Eviscerated weights are generally 75%+ of live weight

These are the typical ages that White Rocks are processed in the commercial chicken industry. If you grow them longer and larger, then extra care is needed to minimize losses. You can try to slow growth through feed restriction or other methods to get them to do something other than eating! Vitamins in the water are great any time (feed restriction, hot/cold weather, or periods of stress).

Rustic Ranger Weights

Approximate Rustic Ranger Live Weights						
Age in weeks	Females			Males		
	kgs	lbs	Approx feed kgs	kgs	lbs	Approx feed kgs
6	1.55	3.4	3.1	1.66	3.7	3.5
7	1.96	4.3	4.0	2.1	4.5	4.5
8	2.36	5.2	4.9	2.53	5.6	5.4
9	2.75	6.1	5.8	2.94	6.5	6.4
10	3.09	6.8	6.7	3.31	7.3	7.4
11	3.39	7.5	7.7	3.66	8.1	8.5
12	3.69	8.1	8.9	3.95	8.7	9.8

Note: Eviscerated weights are generally 75%+ of live weight

The heaviest colour broiler. Perfect compromise between rusticity, feed conversion rate and yield. They are a great pasture bird and excellent forager. Produces a table bird in just 12 weeks.

Special Dual Purpose

Females will be 5-6 lbs and males 7-8 lbs live weight in 15 weeks. These birds can take up to 13 kgs of feed to reach 15 weeks old.

SPECIALTY TURKEYS

Artisan Gold Turkey

The Artisan Gold is a rare breed that is smaller in size and slow growing. It has black feathers, unique colouring in the face and feet, long black legs, and a pronounced beak. It has natural tendencies such as roaming and roosting, and offers a robust, gamey taste that is exotically different from traditional turkeys.

MiniCLASSIC White Turkey

This turkey is small in stature and has been bred to develop and mature like natural bred turkeys of the past. This means that the Toms don't grow as big and can be harvested more efficiently.

Orlopp Bronze Turkey

This premium broad-breasted turkey has excellent conformation, high meat quality, natural fat layering, and beautiful feathering. Weights and feed conversion will rival traditional Large White turkeys.

Approximate Live Weights (lbs)								
Age in weeks	Artisan Gold		MiniCLASSIC		Orlopp Bronze		Large White	
	Hens	Toms	Hens	Toms	Hens	Toms	Hens	Toms
8	4.75	5.93	6.52	8.13	8.14	9.79	8.65	10.85
9	5.75	7.35	8.04	10.08	9.81	11.99	10.61	13.49
10	6.75	8.84	9.60	12.11	11.51	14.33	12.69	16.47
